HOW IS THE QUALIFICATION ACHIEVED?

This qualification is designed with the flexibility to choose unit standards that apply to individual workplace contexts and allows Connexis to award the qualification if the candidate has achieved the unit standard through other means.

Unit standards may be completed by carrying out unit standard-based provider training courses or by “on job” assessment using Connexis resources.

WHICH SKILLS DOES IT COVER?

Developed with industry, for industry, this qualification represents best practice. It covers:

- **Legislative requirements and workplace health and safety practices to the general workplace environment.**
- **How to apply the requirements for workplace health and safety communication to a job role.**
- **Applying principles of health and safety risk assessment to a job role.**
- **Benefits of good workplace health and safety practices on themselves, their families, their place of work and the wider community.**

Elective units cover:

Civil construction, electricity supply and transmission, water and telecommunications industries.

ENTRY REQUIREMENTS

Trainees must be currently working in the infrastructure industry and have employer support for the delivery of training and assessment where there is a culture of workplace health and safety practices. They may already be trade qualified and require workplace health and safety training.
