NEW ZEALAND CERTIFICATE IN

Electricity Supply (Introductory)

Strand in Electrical Works

Skills Covered:

- Working safely and keeping surrounding colleagues safe on an electricity supply worksite.
- Understanding how the Electricity Act, regulations and Industry rules and guides govern best practice.
- Working under direct supervision, in a team, to competently and safely complete tasks.

The Electrical Works strand covers applying knowledge of the principles of electricity supply, legislation, and industry standards to work.

Modes of Delivery:

This programme is achieved through a blend of on-job and off-job assessment. It is completed through workbooks, eLearning, or block courses through a provider.

Entry Requirements:

This is an entry-level qualification where the only requirement is that the learner must have a job in the electricity supply industry to be exposed to the relevant skills covered.

Progression Pathways:

Graduates of this qualification will be able to work in introductory roles in the Electricity Supply industry or continue to further training. Next steps could include qualifications in Utility Arboriculture, Cable Jointing, Line Mechanic Distribution or Electrical Trade. By enrolling in the Electrical Works strand, graduates will also be able to apply for an Electrical Workers' Registration Board Trainee Limited Certificate.
