NEW ZEALAND APPRENTICESHIP IN INFRASTRUCTURE WORKS

Pipe Installation

Skills Covered:

- Meeting health, safety, environment, and quality assurance requirements when installing pipes.
- Applying knowledge of pipes, fittings, and structures to complete pipe installations to job specifications.
- Installing pipes underground using appropriate trenching installations methodology and technology.

Entry Requirements:

The learner must be employed in the infrastructure industry and be exposed to the relevant skills covered. It is recommended the learner hold the New Zealand Certificate in Infrastructure Works (Level 3) before being signed up to this qualification.

Modes of Delivery:

This programme is assessed on-job and is completed through workbooks. It can also be achieved through Advanced Portfolio Assessment (APA). If the learner has a minimum of 4 years experience working in the industry, and can provide a portfolio of evidence from the past 24 months linking to the level of this programme's unit standards, then APA could be a great option to recognise existing skills.

Progression Pathways:

Graduates can progress into the NZ Certificate in Infrastructure Works (Single Site Supervision) (Level 4), or the NZ Certificate in Infrastructure Works (Projects) (Level 5).
