NEW ZEALAND CERTIFICATE IN

On-site Wastewater Management System Design

Skills Covered:

- Communicate with stakeholders to develop a brief for the design of an on-site wastewater management system.
- Evaluate site and soil characteristics.
- Prepare risk management plans for a specific site.
- Apply knowledge of regulatory requirements and domestic wastewater treatment processes to the selection and design of an on-site wastewater management system.
- Communicate requirements for operation, monitoring and maintenance to a range of stakeholders.
- Review designs for, and inspect, on-site wastewater management systems.

Modes of Delivery:

This programme is assessed through a combination of e-learning assessment and off-job block courses.

Entry Requirements:

The learner must be employed in a role where they will be designing on-site wastewater management systems, and be exposed to the relevant skills covered.

Progression Pathways:

Graduates will be able to operate under limited supervision. This is a stand alone qualification, however it can enable you to move into higher qualifications.
