NEW ZEALAND CERTIFICATE IN

Wind Farm Maintenance

Skills Covered:

- Monitoring the workplace and responding to issues as required to maintain a safe and effective workplace in a wind farm environment.
- Diagnosing and repairing faults in electrical, mechanical and hydraulic systems used in wind turbines to comply with manufacturer's and asset owner's specifications.

Modes of Delivery:

This programme is assessed on-job, and is completed through workbooks or eLearning. It can also be achieved through Advanced Portfolio Assessment (APA). If the learner has a minimum of 4 years experience working in the industry, and can provide a portfolio of evidence from the past 24 months linking to the level of this programme's unit standards, then APA could be a great option to recognise existing skills.

Entry Requirements:

The learner must be employed in the wind energy industry and exposed to the relevant skills covered. It is recommended the learner also hold the New Zealand Certificate in Wind Farm Maintenance (Level 3), before being signed up to this qualification.

Progression Pathways:

Graduates will be qualified to work in roles such as:

- Wind Turbine Technician
- Technical Specialist
- Blade Repair Technician
- Commissioning Engineer
- Site Manager
- Senior Manager

This programme can also lead to the New Zealand Diploma in Engineering (Level 6) with strands in Civil Engineering, or Electrical Engineering.
