connexis.org.nz

NEW ZEALAND DIPLOMA IN INFRASTRUCTURE

Asset Management

Skills Covered:

- Applying the essential components of good asset management practice in the infrastructure sector.
- Contributing to the preparation, implementation and review of infrastructure asset management planning for an organisation.
- Developing an infrastructure risk management plan for an organisation.
- Developing the asset lifecycle management plan for an organisation.
- Completing an optimisation process to enhance outcomes for an infrastructure project in an organisation.

Entry Requirements:

To enrol in this programme the learner must be employed in the infrastructure industry. The learner should also have oral, written and interpersonal communications, and math skills.

Modes of Delivery:

As the programme is designed for self-paced learning, time may vary between individuals. It is achieved on-job and completed through workbooks

Progression Pathways:

Graduates of this qualification will have the recognised skills to work in infrastructure asset management roles for private and public asset owners, consultants, and contractors.
