

## 4163 Principles of Erosion and Sediment Control – Micro credential (MC) – Industry Consultation Feedback

You are invited to provide feedback on the **4163 Principles of Erosion and Sediment Control (MC)**

Te Pūkenga-Connexis has been co-designing with an industry reference group to review and deliver the 4163 Principles of Erosion and Sediment Control – MC. As part of our discussions with industry, it has been recognised that there is a skillset gap within the current workforce, and we are requiring a wider industry voice to support the application process.

This survey is to gather feedback from key partners and stakeholders about this micro credential (MC).

The 4163 Principles of Erosion and Sediment Control has been designed to provide Aotearoa New Zealand with people who have the skills and knowledge to understand the impact of erosion and sedimentation on a worksite and the surrounding environment.

What is included in this MC:

*US No.	Title	Knowledge and Skills	Credit Value	NZQA Level
31942	Demonstrate knowledge of the impact of erosion and sedimentation on an infrastructure worksite	<ul style="list-style-type: none"> <li>-Demonstrate knowledge of the impact of erosion and sedimentation on an infrastructure worksite;</li> <li>-Demonstrate knowledge of Mana Whenua values for an infrastructure worksite.</li> </ul>	5 credits	L3

*\* US – Unit Standard*

The above US are also included as electives in the New Zealand Certificate in Infrastructure Works (Pipeline Construction and Maintenance) within the drinking water, stormwater and waste water strands.

**Feedback for this consultation will close at 5pm on Friday 24 March 2023**

Please feel free to share this survey link within your networks.
