

4164 Erosion and Sediment Control Plans – Micro credential (MC) – Industry Consultation Feedback

You are invited to provide feedback on the **4164 Erosion and Sediment Control Plans (MC)**

Te Pūkenga-Connexis has been co-designing with an industry reference group to review and deliver the 4164 Erosion and Sediment Control Plans – MC. As part of our discussions with industry, it has been recognised that there is a skillset gap within the current workforce, and we are requiring a wider industry voice to support the application process.

This survey is to gather feedback from key partners and stakeholders about this micro credential (MC).

The 4164 Erosion and Sediment Control Plans has been designed to provide Aotearoa New Zealand with people who have the skills and knowledge to interpret and implement erosion and sediment control plans.

What is included in this MC:

*US No.	Title	Knowledge and Skills	Credit Value	NZQA Level
31943	Implement an erosion and sediment control plan at an infrastructure worksite	<ul style="list-style-type: none"> - Interpret the requirements of an erosion and sediment control plan; and - Implement an erosion and sediment control plan at an infrastructure worksite. 	20 credits	L4

* US – Unit Standard

Feedback for this consultation will close at 5pm on Friday 24 March 2023

Please feel free to share this survey link within your networks.
