

Industry Consultation Feedback

New Zealand Certificate in Infrastructure Works (Pipeline Construction and Maintenance) with strands in Drinking-Water, Stormwater and Wastewater and Trenchless Technologies –

You are invited to provide feedback on the above programme.

Te Pūkenga-Connexis has been co-designing with an industry reference group to review the New Zealand Certificate in Infrastructure Works (Pipeline Construction and Maintenance) with strands in Drinking-Water, Stormwater and Wastewater, and Trenchless Technologies –

As part of review with industry, it has been recognised that there is a need for a new version of the programme and we are requiring a wider industry voice to:

- gather key partners and stakeholders feedback on the proposed programme and course structure.
- support the application process.

The New Zealand Certificate in Infrastructure Works (Pipeline Construction and Maintenance) with strands in Drinking-Water, Stormwater and Wastewater, and Trenchless Technologies has been designed to provide Aotearoa New Zealand with people who have the skills and knowledge to complete pipeline construction and maintenance in a range of contexts, including specialisations in drinking water, stormwater and wastewater, and trenchless technologies.

You will notice that unit standards are now grouped into courses which form the structure of the training programme.

Feedback for this consultation will close at 5pm on Friday 24 March 2023
