What does your event look like

We are constructing a new wastewater treatment plant that will process Wellingtons ‘sludge’ and turn it in to a dry pellet product that can be used for forestry (for example) instead of currently where it is sent to landfill. This is part of the council's sustainability goals. We would present the girls the construction project and the completed plant's function. Then split into groups for activities; site tour, go in crane or excavator, bridge building activity (desktop) Presentations from – Keisha – apprentice, Chloe – Project Engineer, Keeley – Quantity Surveyor Cadet

Time	Activity	Responsible Co-Host Connexis
